

REMARKS

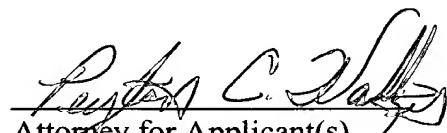

The Office Action dated December 21, 2004 has been received and reviewed by the applicant. Claims 6-8 are in the application. Claims 6-8 stand rejected. Claim 6 is amended. Reconsideration is respectfully requested.

Claims 6-8 stand rejected under 35 U.S.C. 102(b) as being anticipated by Bell (6,061,532). The entirety of the rejection is not repeated herein for brevity. In any event, claim 6 is amended to more clearly point out and distinctly claim the present invention. In this regard, Bell clearly does not teach elements (c), (d) and (e) of the claim 6 because Bell does not teach a "wire frame model" and consequently does not teach its use as in the claimed invention. Bell teaches the use of personalized digitized images (the title) not wire frame models. Additionally, the claimed invention claims a "kiosk" which is a stand-alone unit that processes images in real time. Bell does not teach a kiosk and is limited to sending images to a photofinisher (abstract). It is respectfully submitted that this does not teach or suggest a kiosk.

Should the Examiner consider that additional amendments are necessary to place the application in condition for allowance, the favor is requested of a telephone call to the undersigned counsel for the purpose of discussing such amendments.

For the reasons set forth above, it is believed that the application is in condition for allowance. Accordingly, reconsideration and favorable action are respectfully solicited.

Respectfully submitted,
